GO #FASTAFRICA!

Together, we created more awareness of the need for fast, affordable, safe and transparent Internet in Africa. Now, we are taking **our demands** to leaders at the World Economic Forum on Africa, African Union and United Nations

WE NEED F.A.S.T. INTERNET IN AFRICA FOR ALL TO MEET OUR DEVELOPMENT GOALS

FAST

For true economic impact, we need average download and upload speeds of at least 4 Mbps per second.

AFFORDABLE

A basic prepaid data plan of 1GB should cost less than 2% of average national monthly income.

SAFE

Our online privacy and security should be protected in line with the African Declaration of Internet Rights and Freedoms.

TRANSPARENT

ICT policies and laws, and information about taxes and prices need to be open and easy to understand.
